PROFESSIONAL SUMMARY

Versatile Software Engineer with 5 years of experience in backend development, cloud infrastructure, and data engineering, actively transitioning to a Data Science role. Strong programming foundation in Python and SQL with growing expertise in machine learning through self-study and personal projects. Completed several ML courses and Kaggle competitions. Eager to leverage engineering skills in data-driven roles.

TECHNICAL SKILLS

Languages: Python (intermediate ML), JavaScript, Java, SQL, Bash

ML/Data Libraries: Scikit-learn, Pandas, NumPy, Matplotlib (personal projects)

Backend/Cloud: AWS (EC2, S3, Lambda), Docker, Kubernetes, REST APIs, FastAPI, Django

Data Engineering: PostgreSQL, MySQL, Redis, Apache Kafka (basic), ETL pipelines

Tools: Git, Jenkins, Terraform, Jira, Linux

Learning: TensorFlow (beginner), PyTorch (beginner), Tableau (basic)

PROFESSIONAL EXPERIENCE

Senior Software Engineer | Accenture, Chicago, IL

March 2021 – Present

- Designed and maintained data ingestion pipelines processing 500K+ records/day using Python and Apache Kafka.
- Built REST APIs in FastAPI serving ML model predictions (models trained by data science team).
- Automated cloud infrastructure using Terraform and AWS CloudFormation.
- Optimized SQL queries for a PostgreSQL data warehouse, reducing query times by 45%.
- Began applying scikit-learn models for internal tooling: built a log anomaly classifier for DevOps alerts.

Software Engineer | ThoughtWorks, Chicago, IL

July 2019 – February 2021

- Developed backend microservices for fintech clients using Java and Python.
- Participated in data modeling and database design for reporting systems.
- Applied basic statistical analysis for performance benchmarking.

DATA SCIENCE PROJECTS (PERSONAL)

- Kaggle: House Price Prediction — Top 15% leaderboard using XGBoost + feature engineering.
- Built a stock price sentiment analyzer using NLTK and basic logistic regression (GitHub).
- Completed Andrew Ng's Machine Learning Specialization and DeepLearning.AI TensorFlow Developer Certificate.
- Personal project: Customer segmentation using K-Means clustering on e-commerce dataset.

EDUCATION

B.S. in Computer Science

University of Illinois at Chicago | GPA: 3.6/4.0 | 2019

CERTIFICATIONS

- AWS Certified Solutions Architect – Associate (2022)
- TensorFlow Developer Certificate – Google (2023)
- Machine Learning Specialization – Coursera/DeepLearning.AI (2023)

- IBM Data Science Professional Certificate (2022)
